

## **RULES PERTAINING TO THE GROUNDS IN \_\_\_\_\_ CEMETERY**

\_\_\_\_\_ Cemetery has a significant historical background in \_\_\_\_\_ County. While we have no full time caretaker, the \_\_\_\_\_ Cemetery Association attempts to maintain the cemetery appropriately by mowing the grass and periodically trimming the trees and bushes.

To make maintenance and care of \_\_\_\_\_ Cemetery easier for us to handle, and to contribute to the desirable overall appearance of the cemetery, \_\_\_\_\_ Cemetery Association adopts these rules:

1. When erecting headstones they should be \_\_\_\_\_.
2. The planting of trees, bushes and flowers is not permitted. The planting of grass, such as St. Augustine, is permitted. However, \_\_\_\_\_ Cemetery Association assumes no responsibility for the watering of planted grass. It will be mowed when and as the entire cemetery is mowed.
3. Interested parties are permitted to attend gravesites by watering and trimming and the placing of flowers in receptacles. The \_\_\_\_\_ Cemetery Association assumes no responsibility should flower receptacles and their contents be lost, turned over, broken or removed. Empty receptacles should be removed from gravesite except where they are a part of the headstone arrangement.
4. When ordering the erection of a headstone, it is strongly recommended that the monument company install a reinforced concrete below-ground base foundation. Without a proper and substantial foundation headstones over time become unstable.
